Paula:

The reclamation permit for the Sunnyside Gold Mine, Permit No. M-1977-378, is active. The permit boundary currently encloses approximately 159 acres, which includes approximately 64 acres at Mayflower Tailing Pond No. 4, and approximately 21 acres at or nearby the American Tunnel area. The Division holds \$60,534 financial warranty to ensure the completion of reclamation.

Please contact me if I can be of greater assistance.

I have forwarded your questions to our Minerals Staff in Durango.

Bob or Wally - is either Sunnyside's permit for the American Tunnel or the Mayflower Mill still active? If so, is there any bond with either of these permits?

Kirstin – Thank you for the map and information. I have a Q for you – is either Sunnyside's permit for the American Tunnel or the Mayflower Mill still active? If so, is there any bond with either of these permits? Just wondering.....

Here are two shapefiles - see attached:

- There is Animas_ActivePermit_Abv_Agton.shp - this is active permits in the Animas Watershed above Silverton.
- • Then, Animas_Permit_Abv_Agton.shp - this is all permits, terminated (TR), Application Withdrawn (WD).

The permits are named M(YEAR)+####. So, M1987140 was permitted in 1984 and was numbered permit 140.

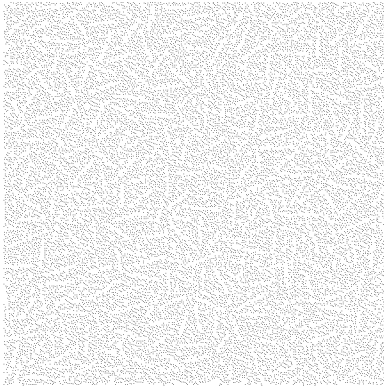

Look through all the fields in the shapefile for information about the permit. Let me know if you have any questions.

Finally - a PDF attachment of a map of all the permit sites.

If you want a print out of all the detailed information about all the permits we might be able to get you something from the Minerals Staff.

Kirsten – How would I go about getting a list of the mining permits in the Animas River watershed at Silverton and above? I looked on the DMSR webpage but I couldn't find it. Thanks.
